Dear friends and members,

It is my pleasure to invite you to the 5th international conference of the Network of Online Registration for Anaphylaxis (NORA e.V.).

In this year's conference we will focus on drug allergy. Drugs are among the most frequent elicitors of anaphylaxis in adults but may even occur in children. Major demands and limitations concern the diagnostics of drug allergy.

Moreover, we will present our new online system to the members and will discuss ongoing and new projects within the anaphylaxis-registry.

Again we will have clinical case presentations from our centers for a discussion among our members.

Finally, we will take a look at the availability of autoinjectors worldwide and will shed more light on refractory anaphylaxis. I am looking forward to see you here again in Berlin. Hopefully the meeting is as interactive and fruitful as before and will promote the excellent continuation of our successful network.

Kind regards

*Univ.-Prof. Dr. med. M. Worm*
